Shareholder Release

Lake Mary, Florida, October 25, 2007 – Bullzi Security Inc. (BLLZ.pk) *Investor Relations Initiatives* - Based upon the recent stock activity for BLLZ, the Management Team at Bullzi Security, felt that it was important to issue a release to our current and future shareholders regarding the status of the company. Over the past few months we've issued numerous press releases related to new products, new clients and new contracts. Even with all of this positive news, our stock has slid downward. There was, and still is, no justified reason for this and by no means is this price any reflection of operations. Throughout the year, we have kept on pace with our revenue targets and in 4Q07, we are growing at the fastest rate yet. Fourth quarter revenues will be more than double that of the third quarter!

A fundamental measure of our success will be the shareholder value we create over the long term. From the very beginning of Bullzi Security Inc., our emphasis has been on the long term and as a result, we may make decisions and weigh tradeoffs differently than some other companies. Accordingly, it is important for you, our shareholders, to understand our fundamental management and decision-making approach so that you may ensure that it is consistent with your own investment philosophy. We are firm believers that the long-term interests of shareholders are tightly linked to the interests of our customers. If we do our jobs right, today's customers will buy more tomorrow, we'll add more customers in the process, and it will all add up to more cash flow and more long-term value for our shareholders.

Even though we have made tremendous strides as of late, we are not resting on our laurels. In September, Bullzi engaged a new marketing company to assist us with our investor relations and communications efforts. For example, we met with over 30 institutional investors, high net-worth individuals and analysts, as well as conducted conference calls with numerous others. Our meetings have been well received by Wall Street, and as a result, we are starting to build an institutional investor following. Over the next 12 months, we plan to aggressively escalate our marketing initiatives. During this timeframe, we will attend more conferences and trade exhibits than ever before which will enhance our presence to the market place. Bullzi plans to continue this program and expects it will help to increase shareholder value going forward.

While the current share price is a short term inconvenience, it is also a long-term opportunity. The fact is that we have no control of the market that dictates our current share price, but we do have total control of company operations that will set our share price in the future. And this is where we're excelling! While we are currently undervalued, I believe that we have begun to meet our investor goals. Our business model is proving to be a success; we are growing the Company at a very healthy pace; we are working towards profitability; and we expect to be operationally breakeven for Fiscal 2007.

In conclusion, I would like to extend a special thanks to our faithful shareholders who have supported Bullzi Security throughout the year and continue to support us today. In addition, I would like to thank our customers and our employees, both of whom supported the growth of our business over the past year. We are pleased to share our achievements with you.

We are Strong, Stable and Secure!
